Geometrics

For Carpenter's Star, Moda Love or similar half square triangle quilts/blocks

Parallelogram

Multi select 2 parallelogram patterns (p2p parallelogram and p2p parallelogram reverse) by clicking on each pattern while holding down the ctrl key. Starting at the tip of one parallelogram click the corners until you have placed 4 patterns (if they do not place correctly either select the patterns in the opposite order or click your patterns out in the opposite order). Use placement guide as a reference

Chevron Lines

Place the pattern onto your screen and position within your boundary. For more accuracy you may enlarge the pattern to be slightly larger than your boundary and use fill after positioning so the travel lines stitch in the ditch
